MACHETE BOMB

Machete Bomb's formation on a stage is very much like a traditional samba group: cavaquinho, bass guitar, drums and percussion instruments... but as soon as they start to play, the public will feel more incline to react by head banging and mosh, than moving their feet at samba beat.

On their huge curriculum, they have already played with big bands in Brazil such as O Rappa, and have been on important stages like João Rock, Psicodália, Se Rasgum, CoMa, Webfest Valda and so on.
